Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited "the cured polymer" in line 3 of claim 1 lacks an antecedent basis.

With respect to claim 9, it is unclear what additional species are allowed into the genus of the terminology modified by "types". The word "type" therefore makes the modified terminology indefinite. See Ex parte Copenhaver, POBA, 1955, 109 USPQ 118-119. The recited "derivatives" is also indefinite. Improper Markush language is recited and a proper format is "--selected from the group consisting of A, B, C--- and Z". The recited "—the base polymer is selected from polymers or their derivatives of the rubber, styrene-butadiene rubber ----- elastomer or thermoplastic synthetic high polymer types" is confusing since it contains genera and species, and a separate claim having a narrow scope is suggested. The recited "the rubber" in line 3 lacks an antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 59024627.

JP teaches multi-colored granules comprising a binder and coloring materials in abstract. Thus, the instant invention lacks novelty.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schonfeld et al (US 6,017,984).

Schonfeld et al teach polymeric pellets having the instant shade in abstract and examples. Coated substrates are also taught at col. 9, lines 8-20. Thus, the instant invention lacks novelty.

Claims 11-13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Weaver et al (US 5,962,557).

Weaver et al teach polymeric pellets having the instant shade and their use at col. 1, lines 11-21, col. 6, line 58 to col. 7, line 8 and in examples 1-3. Thus, the instant invention lacks novelty.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19-25 of copending Application No. 10/278,013. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant coating and molded articles encompasses those of said application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
